The COVID-19 pandemic has had a tremendous impact on the world, causing immense human suffering, economic damage, and significant changes to the health, social, and environmental sectors. According to WHO, as of December 31, 2020, over 82 million people have been infected and 1.8 million have died from the virus. Supply chain management has struggled with the sudden increase in demand for certain products and the restrictions on travel and production that have been in place since the pandemic began. Companies are trying to adapt to the new reality, and changes that will persist after the pandemic is over are likely to emerge.
