

Essential K® Rebuild Performance Horse Ration Balancer Makes its Tribute® Debut

UPPER SANDUSKY, OHIO, UNITED STATES, October 31, 2023 /EINPresswire.com/ -- Horse owners have a new option to help manage their equine companions' unique nutritional needs. Essential K® Rebuild is a low sugar/starch (NSC) ration balancer specifically designed to support post-exercise recovery in active and performance horses. The inclusion of turmeric and chromium sets this ration balancer apart from Tribute®'s traditional Essential K®. Chromium supports optimal glucose use in healthy horses and turmeric is research proven to improve post-exercise muscle recovery. At 12.5% NSC, Essential K® Rebuild can be fed as a standalone ration balancer to easy-keepers or be top-dressed on any existing feed program. This product may replace traditional Essential K® in a performance horse feeding program, though special attention must be made to the very specific feeding rate of this product. Essential K® Rebuild also contains pre- and probiotics to support horse digestive health.

Added chromium supports optimal glucose use in healthy horses.

Contains turmeric, which is research proven to improve post-exercise muscle recovery.

Low NSC (sugar & starch) levels and a low feeding rate keep sugar & starch intake minimal.

Nicole Rambo, Ph.D. nutritionist, dedicated two episodes of [The Equine Connection Podcast](#) to discuss chromium and turmeric use in equine diets. The Equine Connection Podcast is available on all major podcast platforms, including Apple Podcasts, Spotify, iHeartRadio, Pandora and Google Podcasts.

Horse owners can purchase Essential K® Rebuild at their local Tribute® dealer, or at [Tributeequinenutrition.com](https://tributeequinenutrition.com) in areas without a Tribute® dealer.

About Tribute:

[Tribute® Superior Equine Nutrition](#) is a nutrition company dedicated to people passionate about their horses, and their legacy has been built upon the promise to provide the best equine nutrition and customer experience.

All Tribute® feeds are manufactured in ionophore-free facilities to provide safe and consistent nutrition. The products are formulated by Ph.D. nutritionists and are fully fortified and balanced for optimum performance. All ingredients and every finished product are inspected to ensure

that every customer receives the very best feed, or their money back.
