"Reviewed By K.C. Finn for Readers' Favorite

The Quest of the Singular Keepers is a work of fiction in the science fiction and action-adventure subgenres. It is best suited to young adult and adult readers and forms the third segment of the Keepers storyline in the wider Lightning Brain Series, of which it is the eighth novel. Penned by author Cliff Ratza, we see the Keepers and the younger generation coming into their own in this empowering tale as the cloned children of Irani venture forth on their own path. Meanwhile, the juxtaposition of ideas between Irani and Electra continues to spark fantastic new movements in biotechnology and cyber science, but as usual, danger waits around every corner for our brilliant and beautiful heroine.

Author Cliff Ratza offers more and more for fans of the Lightning Brain Series by delving even deeper into the technical science fiction world of biotech but also leaving plenty of room to develop some really engaging political thriller elements in this newest story incarnation. One of

the things that I found especially engaging in this tale is the new settlement of consciousness between Irani and Electra, which has taken quite some time to battle out from one identity to another, but now flows totally naturally in the narrative and adds so much perspective and intrigue to every encounter that Irani has. There were some really shocking moments of danger in this volume that burst onto the scene with many vivid and cinematic descriptions too. Overall, The Quest of the Singular Keepers is another blockbuster science fiction tale that will certainly capture the imaginations of all who read it."
