

# Utility Poles Market: The Ultimate Guide | Asia-Pacific Dominate by South Korea, China, Singapore, Japan

*Utility Poles Market is anticipated to exceed USD 58.8 billion by 2026*

WILMINGTON, DELAWARE, UNITED STATES, October 31, 2023  
/EINPresswire.com/ --

According to a new report published by Allied Market Research, The global [utility poles market](#) was valued at \$45.6 billion in 2018, and is projected to reach \$58.8 billion by 2026, growing at a CAGR of 3.2% from 2019 to 2026.

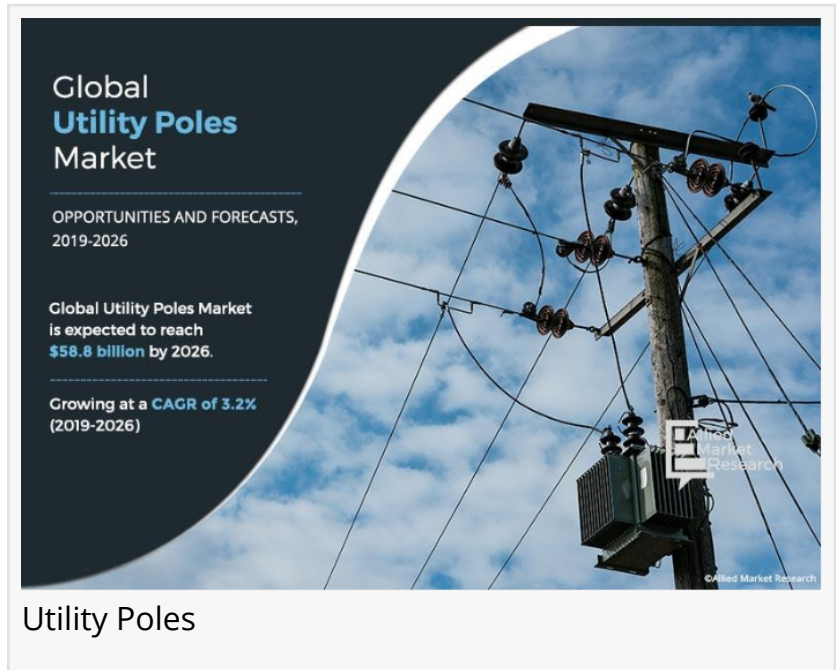

Utility poles, also known as power poles or telephone poles, are vertical structures used to support overhead power lines, telecommunication cables, and other utilities. They are a common sight in urban and rural areas and play a crucial role in delivering essential services such as electricity, telephone, internet, and cable television.

“

The global utility poles market is projected to witness significant growth due to rise in adoption in the telecommunication industry.”

Utility poles are a vital component of modern infrastructure, enabling the efficient delivery of essential services to communities and supporting the functioning of electrical, telecommunications, and cable TV networks. Advances in technology and materials continue to enhance the reliability and efficiency of utility poles, making them a

## Top Companies

Valmont Industries Inc., Skipper Ltd., Nippon Concrete Industries Co. Ltd., El Sewedy Electric Company, Hill & Smith Holdings PLC, Stella-Jones, FUCHS Europoles GmbH, Omega Factory, Pelco products Inc., RS Technologies Inc., and others.

By type, distribution pole emerged as the global leader in 2018 and a similar segment likely to continue its dominance on the global utility poles market. Electric distribution activities required a repeated number of poles as per the electricity demand which drives the growth of this segment.

By material, wood is the largest revenue-generating segment in 2018. Wood is the pioneer material in the pole making industry due to which it is still used significantly across the globe. However,

By application, energy transmission and distribution is the major segment accounted for around 70% market share in 2018. Utility poles are mainly required in the energy transmission and distribution activities that make this segment the largest one among others.

Composite utility poles offer the longest lifespan due to which it is expected to register highest CAGR during the forecast period.

Some of the other factors driving the adoption of utility poles are the expansion of existing electricity networks, increase in electricity access rate in developing and underdeveloped countries, and the introduction of monopoles.

Monopoles are the latest invention in this market, however, lack of awareness associated with them is holding the market from maximizing the growth.

Composite poles are also introduced in the market that is showing greater potential for the coming years.

This pole type has superior properties and is lightweight as compared to other poles, due to which composite poles are expected to register the highest CAGR during the forecast period.

Steel's material profile is approved as a green material and the market has seen different growth perspectives thereafter.

Most of the aged wooden utility poles have started to replace from steel poles due to greater benefits such as ease of installation, reliability, durability, life cycle cost, and environmental

considerations.

Currently, there are more than 150 utility poles are in service in North America (of which more than 70% are wooden) and around 2.5 million are getting replaced by steel poles. As a result, steel-based poles likely to have a promising future during the forecast period.

Utility pole is an end to end connection of electrical wires that carries and distributes electricity as per the convenience. Therefore, utility poles are designed to be durable in nature.

The normal life cycle of a utility pole ranges from 30 to 50 years but this life span varies based on the material used.

Wood poles were preferred mostly in response to material suitability but gradually wooden poles are getting replaced by steel and now composite based poles due to enhanced properties and benefits associated with them.
