

# Commerce Cloud Market Surge at 22.2% CAGR to Reach USD 138.2 Billion by the End of 2032

*The increasing prevalence of smartphone usage across various industries & among individuals is a key driver for the global commerce cloud market growth.*

PORTLAND, PORTLAND, OR, UNITED STATE, November 1, 2023

/EINPresswire.com/ -- According to the report, the commerce cloud industry generated \$19.2 billion in 2022, and is anticipated to generate \$138.2 billion by 2032, witnessing a CAGR of 22.2% from 2023 to 2032.

Commerce cloud is one of the prominent B2B and B2C commerce solutions. It is a cloud-based platform that allows organizations to develop unified, intelligent shopping experiences across all domains, including physical, online, mobile, and social stores. Several features and tools of the commerce cloud enable organizations to provide online products and services, improve customer communication, and automate marketing and sales tasks. Additionally, it allows retail businesses to acquire better knowledge of the business operations, make informed decisions, respond to market dynamics to increase growth profitability and opportunities.

The growing proliferation of smartphones, the increase in the growth of e-commerce industries in several countries and the growing adoption of cloud computing solutions are the major factors that drive the growth of the global [commerce cloud market](#). However, a lack of technical expertise and data security and privacy concerns can hamper the adoption of the commerce cloud in businesses. Furthermore, the increasing application of advanced technologies such as blockchain and AI and the surge in integration of 5G technology in businesses is expected to offer remunerative opportunities for the expansion of the global market during the forecast period.

Covid-19 Scenario:

- The outbreak of the COVID-19 pandemic had a mixed impact on the commerce cloud industry. While some sectors experienced challenges, others witnessed opportunities for growth and innovation. One of the positive impacts of the pandemic on the commerce cloud market was the increased demand for e-commerce platforms.
- In addition, the growing online presence of people after the COVID-19-induced lockdowns and social distancing policies fueled the need for commerce cloud solutions. The pandemic caused a significant shift in consumer behavior, with growth in e-commerce and a decline in physical shopping store visits. These factors have propelled the growth of commerce cloud solutions among industries.

Based on application, the fashion and apparel segment held the highest market share in 2022, accounting for more than one-third of the commerce cloud market revenue, and is estimated to maintain its leadership status throughout the forecast period. Commerce cloud provides organizations with the insight necessary to comprehend customer preferences, behavior, and purchasing trends. However, the pharmaceutical and grocery segment is projected to manifest the highest CAGR of 27.1% from 2023 to 2032. The increasing demand for an effective solution to expand business operations in the commerce cloud market is further expected to propel global market growth.
