

# TechnoDigm™ and perfectdos forge Strategic Partnership to propel Microdispensing Innovation in South East Asia

SINGAPORE, November 3, 2023

[/EINPresswire.com/](https://www.einpresswire.com/) -- TechnoDigm™, a fluid dispensing solutions provider and perfectdos, the renowned leader in micro dispensing technology, are thrilled to announce their strategic partnership aimed at driving innovation in the field of micro dispensing.

TechnoDigm™ (<https://www.technodigm.com/>), with its track record of delivering cutting-edge technology solutions, is an ideal partner for perfectdos. Their exceptional expertise in fluid handling, process automation, data analytics, and emerging technologies aligns perfectly with the goals of perfectdos. Together, they aim to harness the power of their combined expertise and drive innovation to redefine micro dispensing processes and setting new benchmarks for performance in South East Asia.

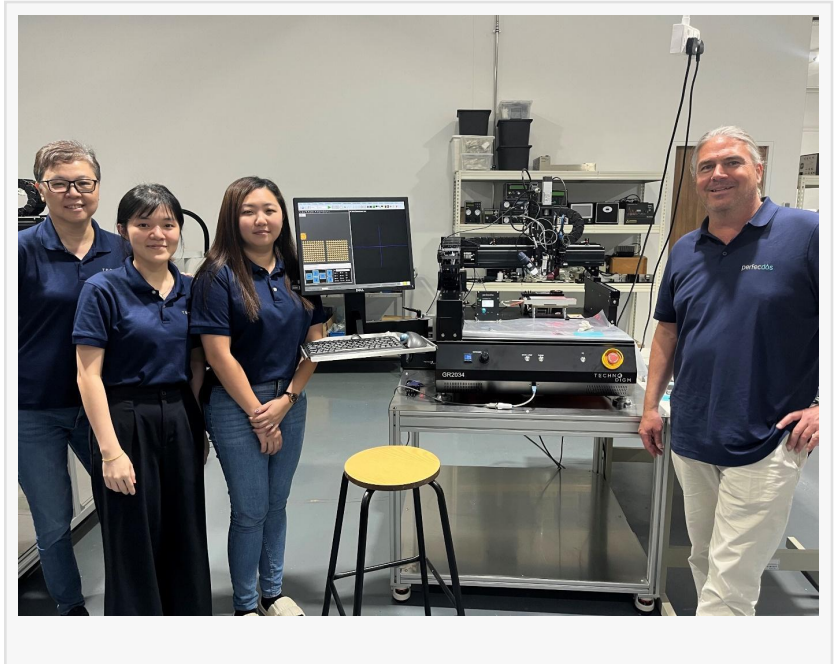

perfectdos specializes in the development and production of state-of-the-art micro dispensing jet valves. Their precision-engineered solutions have garnered widespread acclaim for their reliability and accuracy, making perfectdos a trusted name in the industry. With an unwavering commitment to advancing micro

dispensing technology.

dispensing technology, the company continually pushes boundaries to meet the evolving needs of its customers.

Siew Luan, General Manager of TechnoDigm™, agrees with Benjamin Kratz, Sales Director at perfectdos: “The strategic partnership between perfectdos and TechnoDigm™ will enable both of us to combine our expertise, resources, and perspectives. TechnoDigm™ deep knowledge and experience in fluid dispensing machines and services will complement perfectdos's high-end jet valves, creating a robust ecosystem for micro dispensing excellence.”

By leveraging their collective strengths, TechnoDigm™ and perfectdos intend to develop integrated solutions that revolutionize micro dispensing applications across various industries, including electronics, optoelectronics, medical devices, and industrial manufacturing.

Through this collaboration, perfectdos and TechnoDigm™ seek to propel the advancement of micro dispensing technology. By incorporating sophisticated automation, intelligent control systems, and data analytics into perfectdos's precision engineered jet valve, the partnership aims to enhance precision, efficiency, and reliability in micro dispensing processes, enabling customers to achieve unparalleled results.

Additionally, the partnership will facilitate knowledge exchange and collaboration, enabling both companies to stay at the forefront of technological advancements. By fostering innovation and sharing best practices, perfectdos and TechnoDigm™ aim to address industry challenges, optimize process scalability, and drive faster time-to-market for their customers.

Both TechnoDigm™ and perfectdos are confident that their strategic partnership will have a transformative impact on the micro dispensing industry. By synergizing their expertise and resources, they aspire to redefine the capabilities of micro dispensing technology, unlocking new possibilities for precision applications and enabling customers to achieve unparalleled results.

About TechnoDigm™: TechnoDigm™ is an expert technology solutions company at the forefront of innovation in fluid dispensing. Their expertise lies in process automation, data analytics, and emerging technologies, such as cutting-edge [fluid dispensing systems](#) and [meter mix equipment](#). TechnoDigm™ partners with industry leaders to deliver cutting-edge solutions that optimize performance and drive success in fluid dispensing applications.

About perfectdos ([www.perfecdos.com](http://www.perfecdos.com)): perfectdos is a leading provider of advanced microdispensing technology, specializing in precision-engineered solutions such as the exceptional jet valve. With a focus on reliability and accuracy, perfectdos continues to push the boundaries of microdispensing to meeting the evolving needs of various industries and driving innovation in microdispensing technology.
