

Global Software Defined Data Center Market: Propelled by Digitalization Adoption

*The Business Research Company's
Software Defined Data Center Global
Market Report 2023 – Market Size,
Trends, And Forecast 2023-2027*

LONDON, GREATER LONDON, UK,
November 3, 2023 /EINPresswire.com/
-- The global [software-defined data
center market](#), valued at \$53.37 billion
in 2022, is projected to reach \$65.53
billion in 2023, showcasing a robust

compound annual growth rate (CAGR) of 22.8%. Despite the tumultuous impact of the Russia-Ukraine conflict, leading to economic sanctions, commodity price surges, and supply chain disruptions, the software-defined data center market is poised for substantial expansion, with an anticipated market size of \$149.09 billion by 2027, maintaining a steady CAGR of 22.8%. The

substantial rise in digitalization adoption is poised to be a
key driver for the accelerated growth of the software-
defined data center market.

Market Segmentation and Key Players

- Type: Software Defined Computing (SDC), Software-Defined Storage (SDS), Software-Defined Data Center Networking (SDDCN), Automation and Orchestration
- Component: Hardware, Software, Services
- Organization Size: Small And Medium-Sized Enterprises

(SMEs), Large Enterprises

- Vertical: Banking, Financial Services And Insurance (BFSI), Information Technology (IT) And Telecom, Government And Defense, Healthcare, Education, Retail, Manufacturing, Others
- Verticals

Leading players in the software-defined data center market, such as VMware Inc., Microsoft Corporation, Hewlett Packard Enterprise Company, Dell Technologies, Oracle Corporation, IBM, Nutanix, Cisco Systems Inc., Huawei Technologies Co Ltd., Fujitsu Ltd., Arista Networks, Citrix Systems Inc., NEC Corporation, Hitachi Vantara LLC, SAP SE, EMC Corporation, NetApp Inc, and

Hyper-Scale Cloud Adoption as a Major Market Trend

A notable trend gaining momentum in the software-defined data center market is the growing adoption by hyper-scale cloud services. Characterized by its extensive scale in computing, hyper-scale computing is predominantly geared towards addressing the demands of big data or cloud computing. Hyper-scale infrastructure is designed to deliver horizontal scalability, culminating in high-performance levels, throughput, and redundancy to facilitate fault tolerance and ensure high availability. Leveraging massively scalable server architectures and virtual networking, hyper-scale computing represents an unparalleled approach to addressing demanding computational requirements.

Regional Analysis and Market Dynamics

In 2022, North America emerged as the largest region in the software-defined data center market, with Asia-Pacific positioned as the fastest-growing region in the forecast period. The comprehensive market analysis delves into an exhaustive evaluation of market dynamics across key regions, including Asia-Pacific, Western Europe, Eastern Europe, North America, South America, the Middle East, and Africa.

[Software Defined Data Center Global Market Report](#) 2023 from TBRC covers the following information:

- Market size data for the forecast period: Historical and Future
- Market analysis by region: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.
- Market analysis by countries: Australia, Brazil, China, France, Germany, India, Indonesia, Japan, Russia, South Korea, UK, USA.

Trends, opportunities, strategies and so much more.

The Software Defined Data Center Global Market Report 2023 by The Business Research Company is the most comprehensive report that provides insights on software defined data center market size, software defined data center market drivers and trends, software defined data center market major players, competitors' revenues, market positioning, and software-

defined data center market growth across geographies. The software defined data center market report helps you gain in-depth insights on opportunities and strategies. Companies can leverage the data in the report and tap into segments with the highest growth potential.
