

IoT in Retail Market Size Expands, Propelling Transformative Customer Experiences with Smart Retail Innovations

IoT in Retail surges driven by demand for enhanced customer experiences, efficient supply chains, and data-driven decision-making in dynamic retail landscape.

PORTLAND, OREGON, UNITED STATES,
November 13, 2023 /

EINPresswire.com/ -- The [IoT in retail market](#) was valued at \$28.14 billion in 2021, and is estimated to reach \$177.90 billion by 2031, growing at a CAGR of 20.3% from 2022 to 2031.

The IoT in retail consists of web-connected smart devices that obtain, analyze, and process data collected from their surroundings using embedded systems includes sensors, processors, and communication hardware. Retail businesses are gradually shifting toward IoT to enhance organizational performance and better understand consumers to provide better customer services, enhance decision-making, and boost value of their businesses.

Factors such as effective store space monitoring, inventory management, supply chain management and customer behavior monitoring drive demand for the internet of things in retail industry. Moreover, optimizing and automating supply chain is one of the main factors for IoT adoption among retailers. Connectivity technologies, including digital signage, top-of-the-shelf displays, beacons, and price displays provide opportunities for a brand to access large volumes of data on customer activity during in-store shopping. However, data security & privacy concerns and high implementation & maintenance cost of IoT devices restrain growth of the market globally.

By offering, the solutions segment dominated growth of the Internet of Things in retail market in

2021, and is expected to maintain its dominance in the upcoming years. The proliferation of smartphones and the use of mobile applications are driving the growth of the retail solutions segment. Emerging application-oriented hardware and retailers' focus on providing integrated solutions is expected to positively impact segment growth.

However, the services segment is expected to witness highest growth rate during the forecast period. Increase has been witnessed in adoption of IoT services among end users as they ensure effective functioning of solutions and platforms throughout the business process. Moreover, increase in adoption of data analytics software and cloud platforms is expected to boost demand for IoT services in the retail sector.

By organization size, the large enterprises segment dominated the global Internet of Things in retail market in 2021, and is expected to continue this trend during the forecast period, owing to increase in adoption of IoT software to integrate this into their existing inventories. Conversely, the small- & medium-sized enterprises segment is expected to grow at the highest CAGR during the forecast period, owing to surge in adoption of cloud-based IoT software as it provides cost-effective and efficient solutions for SMEs.
