Drivers, Restraints, and Opportunities-

With rapid adoption of technology by all levels of lending service providers, the lendtech is being widely preferred by banks, which is fueling the growth of lendtech market. Besides these, over-indebtedness and heavy reliance on technology & internet access hamper the lendtech market growth. On the contrary, lending industry is introducing a gradual shift toward a digital economy across several countries.

Covid-19 scenario-

As COVID-19 cases continued to surge and more restrictions were put in place during the pandemic, many business owners had to take out loans to sustain their businesses. This has spiked the growth for lendtech industry during the period.

COVID-19 brought uncertainty and pressure to businesses across the financial services sector, with many businesses still trying to adapt to a new economic landscape. The lending industry is facing many challenges brought about by the pandemic and one obvious adjustment is an increase in the digitization of services.

The large enterprises segment to rule the roost-

By organization size, the large enterprises segment acquired major lendtech market size in 2021. This is attributed to the fact that larger companies frequently have more assets than their smaller counterparts, and they may utilize these assets to get a company loan or line of credit. Also, when a major corporation borrows money, the loan amount is often significant and can be put to a variety of uses, such expanding an existing business or improving infrastructure.

The consumer lending segment to rule the roost-

By type, the consumer lending segment acquired a major lendtech market size in 2021. This is attributed to both the rise in FinTech companies offering online lending services and the introduction of rules by the government to encourage lender transparency. Also, in the approaching years, variables including offering consulting services before obtaining loans and increasing financing alternatives for enterprises are anticipated to present attractive chances for market advancement.

The banks segment to rule the roost-

By end user, the banks segment acquired a major lendtech market size in 2021. This is attributed to the fact that banking institutions provide lendtech which generally involves advice and execution of transactions on behalf of affluent clients. Moreover, banks also help with financial planning, manage client portfolios, and performs a variety of other financial services in relation to a client's private financing choices with the help of augmented reality technology.

North America garnered the major share in 2021-

By region, the North America dominated the lendtech market share in 2021. This is attributed to the rise in demand from lending businesses for lending technology solutions. A few other key variables supporting the expansion of the market in the area include the rising level of technical improvements and the presence of a sizable number of competitors.

Leading Market Players-

Visa, Inc.
American Express
Fiserv, Inc.
Finastra
Nelito Systems Pvt. Ltd.
Q2 Software, Inc.
Newgen Software Technologies Limited
FIS
Roostify, Inc.
