

BioVeritas Presents at 2023 AFCC Conference

Disruptive upcycling company to discuss innovations in fermentation platforms that will accelerate the low-carbon circular economy

BRYAN, TX, UNITED STATES, November 13, 2023 /EINPresswire.com/ -- [BioVeritas](#), LLC, a bio-based ingredients company pioneering a proprietary upcycling process, today has [Dr. Cesar Granda](#), vice president of innovation & IP for BioVeritas, present at the 3rd Annual Alternative Fuels & Chemicals Coalition Global Biobased Economy conference in Washington, DC. Dr. Granda is set to speak on the topic of "Biobased Manufacturing: Renewable Chemicals, Bioplastics, Biomaterials Creating a Cleaner Planet" with a special focus on innovations that offer a low carbon intensity score by using waste carbon as a feedstock for fermentations.

In this special panel discussion, experts are set to highlight ideas and solutions to supply value-added products and materials while minimizing carbon impact. Dr. Granda will discuss different perspectives about how fermentation solutions will meet the goals of a net negative carbon economy while still providing the products for everyday life, which have mostly been made from petroleum.

"The BioVeritas Process™ is a leading platform for upcycling underutilized plant-based byproducts from the food and agricultural industries which will help eliminate petrochemicals in our everyday life – from our food supply to industrial applications," stated Dr. Granda.

BioVeritas, LLC is a portfolio company of [Ara Partners](#), a private equity firm specializing in industrial decarbonization investments.

###

About BioVeritas, LLC

BioVeritas, LLC, headquartered in Bryan, Texas, is a bio-based ingredients company that is commercializing a proprietary upcycling process. BioVeritas products have industry-leading efficacy and quality intended for innovative companies seeking natural solutions for food preservation, human and animal health, and industrial materials.
