

Teen Launches Pro Bono Robotics Consultancy To Bolster Youth-Led Tech Initiatives

Pujan Patel, a Gainesville, Virginia High School Senior, Has Added a Pro Bono Component to Robot Buddies, His Online Tech Consultancy.

GAINSEVILLE, VA, UNITED STATES, November 12, 2023 /EINPresswire.com/ -- Pujan Patel, a senior

“

Pujan has been passionate about building and breaking down gadgets since a very young age. His enthusiasm is contagious and he brings joy to those who work with him for a collective effort.”

Dhaval Patel

at Gainesville High School in Gainesville Virginia, has launched a pro bono component to [RobotBuddies \(RobotBuddi3s.com\)](https://RobotBuddies.com), his online robotics consultancy that assists and elevates technology-driven charitable projects led by the youth across the nation.

RobotBuddies stands out in crafting intuitive robotic solutions, simplifying complex design and mechanical challenges for its users. This service is Pujan's answer to a noticeable void in accessible, youth-friendly technical guidance, borne out of his own experiences in the school's

robotics lab where he frequently tackled and triumphed over various robotics dilemmas.

"Pujan has been passionate about building... and breaking down gadgets since a very young age. It started with Legos, then went to Minecraft, and when Robotics came along, he dived in completely," explains Dhaval Patel, Pujan's father. "He loves when a challenge is presented and thrives in building a solution that is unique and results-oriented. His enthusiasm is contagious and brings excitement and joy to those who work with him for a collective effort."

RobotBuddies is just one facet of Pujan's digital triad, which also includes Cyb3rsecure.com and Javafri3nds.com. Each venture addresses a distinct gap in tech education: RobotBuddies for hands-on robotics troubleshooting, Cyb3rsecure.com for demystifying cybersecurity essentials, and Javafri3nds.com for navigating the complexities of Java programming. Each site reflects Pujan's core belief in collaborative problem-solving and his drive to convert challenges into opportunities for learning and innovation.

This initiative not only showcases Pujan's technical acumen but also his commitment to social entrepreneurship. By offering his consultancy services without charge, Pujan aims to empower

young tech enthusiasts and charitable organizations with the tools necessary to enhance their projects and broaden their impact.

"The ventures I've started are a direct response to the challenges my peers and I have encountered," says Pujan. "With RobotBuddies, I'm able to support others in overcoming the same hurdles we faced, ensuring that their journey in robotics is a bit smoother than ours."

In an age where technology and social impact increasingly intersect, Pujan Patel and RobotBuddies are setting a new standard for youth-led innovation and community service.

For additional information on RobotBuddies and the new pro bono initiative for teen-led charitable endeavors, visit [RobotBuddies.com](https://www.robotbuddies.com).
