Mono Diglycerides Market Size To Grow At A CAGR Of 7.20% In The Forecast Period Of 2024-2032

30 NORTH GOULD STREET, SHERIDAN, WYOMING, UNITED STATES, November 13, 2023 /EINPresswire.com/ -- Mono Diglycerides Market Outlook

According to a new report by Expert Market Research titled, "[Mono Diglycerides Market Size](#), Share, Analysis, Report and Forecast 2024-

2032", the global mono diglycerides market is projected to grow at a CAGR of 7.20% between 2024 and 2032. Aided by growing food and beverage industry and rising demand for convenient and packaged food products, the market is expected to grow significantly by 2032.

Mono diglycerides are a type of emulsifier used predominantly in the food industry. They are fatty acid esters formed from glycerol and one fatty acid chain. This group of substances is commonly used to combine ingredients such as oils and water, which would otherwise not mix well. Beyond the food industry, mono diglycerides are employed in various other sectors including pharmaceuticals, feed, and plastics, owing to their stabilising, emulsifying, and thickening properties.

The increasing consumer preference for convenience and processed food products is driving the global mono diglycerides market growth. With modern lifestyles becoming more hectic, there has been a significant shift towards ready-to-eat meals, baked goods, and processed snacks, all of which commonly utilise mono diglycerides to maintain product quality and extend shelf life.

The fast-paced lifestyle of the modern consumer has created a robust demand for processed

and convenience foods. Mono diglycerides are essential in the production of these goods, as they improve the texture, stability, and shelf life of products. Apart from the food industry, mono diglycerides are used extensively in pharmaceuticals to improve the texture of creams and ointments, in animal feeds to improve mixing, and in plastics to act as antifogging agents.

The Asia Pacific region is expected to account for a substantial mono diglycerides market share, driven by increasing urbanisation, rising disposable income, and the westernisation of diets, particularly in countries like China and India. North America and Europe are mature markets for mono diglycerides, owing to the high consumption of processed foods and stringent food quality standards in these regions.

With the rise of veganism and plant-based diets, the food industry is undergoing a significant transformation. Mono diglycerides, often derived from vegetable oils, play a vital role in the formulation of these new plant-based products. As these diets continue to gain popularity, it is likely that the demand for mono diglycerides in plant-based food formulations will continue to increase, thereby contributing significantly to the mono diglycerides market expansion.
