The infectious immunology market is segmented based on types of diseases into HIV, hepatitis, pneumonia, tuberculosis, malaria, inflammatory bowel diseases and autoimmune diseases. Approximately 4,00,000 deaths are estimated to be caused by rotavirus infection. HBV affected nearly 1.4 million in the U.S. in 2011. The rising incidence of these infectious diseases creates a worldwide demand for immunological diagnostics and treatment. This suggests that the market would experience a growth spurt in the near future.
