

Table Sauce Market Overview 2032 | Share, Size, Trends, Demand, Analysis and Forecast

PORTLAND, OR, UNITED STATES,
November 13, 2023 /

EINPresswire.com/ -- The increase in popularity of healthy convenience food products among consumers in the recent past has propelled the demand for table sauces. Consumers are shifting their preference toward portable, convenient, and inventive ways to consume healthy on-the-go foods, generally with premium, indulgent and exotic products, which significantly contributes toward the growth of the [table sauce market](#).

Furthermore, consumers today demand enhanced taste experience with high quality, sustainable diets that have perceived health benefits. Due to this reason, there has been a noticeable shift from unhealthy products to healthy food products. This has consequently augmented the demand for table sauce, especially that are prepared using natural ingredients. Furthermore, with the rise in cross-border cuisine, there has been a considerable growth for exotic sauces. However, the use of preservatives and artificial sweeteners in table sauces can potentially hinder the table sauce market growth. This is because consumers are gradually becoming health conscious and informed about the ingredients in their food products.

The market growth is propelled by the inclination towards healthy food products that offer healthfulness. Table sauces offer a portable, convenient, and inventive way to consume on-the-go healthy food products, generally with premium, indulgent and exotic products. Table sauces refer to a preparation that is added to food, typically after cooking, to impart a specific flavour, to enhance the flavour, or to complement the dish. Certain sauces are using prior to serving while some are used during cooking. They have become a part of the daily diet across countries, hence generating high their demand.

Globalization and increase in travel have persuaded people to experience new tastes and

cultures. This cross-cultural interaction has led to a widespread adoption of foreign foods and table sauces, especially in the emerging countries, which acts as one of the major driving forces of the sauces industry. Furthermore, with growing health consciousness among consumers, the demand for “clean”, “free from” and “natural” table sauces has gained high traction. Manufacturers are thereby introducing table sauces using natural ingredients that are minimally processed. Furthermore, the popularity of vegan diets as a lifestyle choice is growing tremendously among consumers owing to health, environmental, and ethical reasons. As a result, plant-based table sauces are gaining substantial recognition. This offers great potential and opportunity for manufacturers to introduce novel table sauces for market growth and expansion.

By product type, the tomato ketchup category was the dominant segment in 2020 with XX% share. This is due to its popularity and its application for commercial as well as household usage. Furthermore, the demand for private label ketchup has been growing in most parts of the world due to the consolidation and expansion of the retail segment. Several retailers are venturing into the private label ketchup market owing to growing popularity. However, the others segment is anticipated to grow at a faster rate during the table sauce market forecast period, owing to the rising popularity of ready to cook pasta sauces. The demand for ready to cook sauces has gained significant traction in the recent years due to consumers rising interest in cross border cuisine.

On the basis of packaging, the pouches category was the dominant segment in 2020 with XX% share in the market. This is due to its convenient and easy-to-use characteristic. Furthermore, they have a better product-to-package ratio as compared to other rigid formats, such as bottles and jars. However, the sachets segment is anticipated to grow at a faster rate during the table sauce market forecast period. This is because they are available in a single-serve, ready-to-consume. They require minimal packaging material, consumes less storage space and most importantly requires low shipping cost. It offers great convenience and flexibility to consumers since it allows table sauces to be carried easily and discreetly.

As per distribution channel, the supermarket & hypermarket segment accounted for the maximum share in the table sauce market in 2020. This is attributed to the fact that supermarkets & hypermarkets provide high visibility and attractive assortment of table sauces to consumers. This enables them to discover new variety and understand the labels and differentiate better among products. Furthermore, supermarket chains are one of the frequently visited stores for purchasing grocery items. Hence, this factor is expected to boost the sales of table sauce in the market. However, the online segment is anticipated to grow at a faster rate during the table sauce market forecast period, owing to rising convenience for consumers and wider consumer reach due to brand websites.

Region wise, Asia-Pacific was the prominent region in 2020 due to tremendous popularity and substantial consumption of table sauces in the region. This was due to the increase in demand for convenient food and meat products as well as rise in the number fast food outlets in the Asia-Pacific region. In addition, this region is one of the largest producers and consumers of table sauce and its products. However, North America is expected to witness a significant CAGR, owing to the increasing interest of people in various foreign and ethnic cuisines, long shelf life, preference for healthy food such as salads with various dressings and gluten-free sauces.

Key findings of the study

By product type, the tomato ketchup segment was the highest contributor to the market, with \$3,489.7 million in 2020, and is estimated to reach \$5,743.4 million by 2030, at a CAGR of 5.2% during the forecast period.

On the basis of packaging form, the pouches segment held the highest share, and is anticipated to grow at a notable CAGR during the forecast period.

In 2020, Asia-Pacific was the most prominent market; however, North America is expected to grow at a significant CAGR throughout the forecast period.
