

Flower Turbines' Charging Stations Provided Energy for Golf Courses

Flower Turbines' wind-solar Charging Stations provide energy for golf courses to recharge golf carts.

ZOETERMEER, NETHERLANDS, November 21, 2023 /EINPresswire.com/ -- [Flower Turbines'](#) wind/solar off-grid Charging Stations provide energy for golf courses to recharge golf carts.

Golf courses are showing their commitment to sustainable energy solutions by installing Flower Turbines Charging Stations to charge golf carts and small electronic devices, offering reliable and accessible electricity, even in remote areas of the golf course.

Beyond functionality, the tulip-shaped design harmonizes with the natural landscape of the golf course.

"After our pilot golf course installation, we are eager to introduce our off-grid charging stations to the golf industry," said Dr. Daniel Farb, Founder and CEO of Flower Turbines. "This solution not only provides a reliable source of power for golf courses, but it also aligns with our mission of promoting clean energy and reducing dependence on fossil fuels."

Here is a video of a Wind/Solar [Charging Station](#) in operation:
