

Breast Pumps Market Sets New Record, Projected at USD 890.73 million by 2030 at 6.8% CAGR: AMR

Growing population & disposable incomes, favorable reimbursement scenarios, & rising awareness & availability of advanced medical technology drive the growth.

PORTLAND, OREGON, UNITED STATES, November 15, 2023 /

EINPresswire.com/ -- Allied Market Research recently published a report, titled, "[Breast Pumps Market](#) by Product Type (Closed System Breast Pumps, Open System Breast Pumps), by Technology (Manual Breast Pumps, Electric Breast Pumps), by Application (Personal Use Pumps, Hospital Grade Pumps): Global Opportunity Analysis and Industry Forecast, 2020-2030." According to the report, the global Breast Pumps Market Size was Valued at USD 461.10 million in 2020 and is Projected to Garner USD 890.73 million by 2030, registering a CAGR of 6.8% from 2021 to 2030.

The report provides a detailed analysis of the top investment pockets, top winning strategies, drivers & opportunities, market size & estimations, competitive landscape, and evolving market trends. The market study is a helpful source of information for the frontrunners, new entrants, investors, and shareholders in crafting strategies for the future and heightening their position in the market.

Increase in number of working women across the globe, rise in healthcare expenditure by the government, favorable reimbursement scenario, and technological developments in electric breast pumps drive the demand for the global breast pumps market. However, risk of contamination with foreign substances and high pricing of breast pumps impede the market growth. On the other hand, surge in various developmental strategies among the key players, high market potential in untapped developing countries, and development of pipeline products are anticipated to pave the way for multiple opportunities in the industry.
