

Integration of threat intelligence into Sweepatic EASM Platform

More protection against data leaks

LEUVEN, BELGIUM, November 16, 2023 /EINPresswire.com/ --

The increased importance of cyber security cannot be overemphasized. Organizations are increasingly reliant on their online presence, but this reliance comes with risks. At a time when stolen and leaked data can cause significant damage, proactive protection is essential. For this reason, it is particularly important to detect stolen and leaked data as quickly as possible so that action can be taken. That is exactly the added value of integrating threat intelligence in your company's continuous attack surface management.

Author: Stijn Vande Casteele, Founder of Sweepatic

If companies can identify leaked access data, this is an effective and decisive weapon in the fight against potential attacks. Threat intelligence enables detailed monitoring of potential

D	Thread Intelligence These are leaked condentials. They are an extremely high risk and should be dealt with as soon as possible. Click on "Threat intelligence" to list all obervations.

threats. In view of the fact that stolen data can have far-reaching consequences for companies from financial losses to reputational damage and legal consequences - this protection mechanism is of crucial importance. The automated function not only offers a time-efficient response to threats, but also a clear advantage over potential attackers. This further development will help to make the digital landscape more secure overall and protect companies even better in the future. Hannah Smeyers Sweepatic +32 497816699 email us here
