

# "Journal Observ Post" Embarks on International Collaboration, Reflecting China's Evolving Science Communication Scene

BEIJING, BEIJING, CHINA, December 5, 2023 /EINPresswire.com/ -- "Journal Observ Post," a WeChat Public Account operated by a small, volunteer-run group, is marking a pioneering step among China's grassroots science communication groups by stepping into a new realm of international collaboration.

In a landscape populated by numerous similar groups, "Journal Observ Post" has distinguished itself by extending its focus beyond domestic borders. These groups have primarily emerged from a shared desire among Chinese researchers and volunteers to democratize scientific knowledge, foster scholarly dialogue within the country, and bridge the gap between academia and the general public, thereby enhancing scientific literacy and awareness.

Their activities traditionally range from providing free access to scientific literature and promoting academic events, to offering insights into journal analytics and keeping the community abreast of the latest research trends.

"Journal Observ Post," while sharing these common goals, is now taking a significant departure from the domestic focus of similar groups by exploring international frontiers. This initiative marks a significant shift, as no other similar groups have yet ventured into international collaborations. By taking this step, "Journal Observ Post" seeks not only to facilitate the entry of international journals into China but also to establish a two-way channel for academic exchange, enriching both the Chinese and global scientific landscapes.
