

Flower Turbines Releases Flat Rooftop Mount for Wind and Solar

Flower Turbines announces its latest product, the Flat Rooftop Mount, a no bolt solution for wind and solar.

LUBBOCK, TEXAS, UNITED STATES,
November 21, 2023 /

EINPresswire.com/ -- [Flower Turbines](https://www.flowerturbines.com/) announces its latest product, the EcoRoof Energy Hub, a patent-pending no bolt solution for wind and solar on flat rooftops.

Traditional rooftop mounting systems come with potential drawbacks such as water leakage and the risk of roof damage during severe weather events. The EcoRoof Energy Hub from Flower Turbines addresses these concerns while offering enhanced safety and resilience. For more information, see the update on our funding site at <https://tinyurl.com/mk4mpnxy>.

Property owners can maximize their energy generation potential by placing wind turbines and solar panels side by side using this versatile system.

The mounting system not only simplifies the installation process but also eliminates the need for traditional bolts, preserving the integrity of the existing roof structure. Each module comes with three turbines pre-arranged to create a synergistic cluster effect and with room for solar.

The mounting system is available first in the EU and soon in other countries.

Flower Turbines makes three sizes of beautiful and technologically advanced small wind turbines. It also provides on-grid and solar-only charging stations. For more information, please contact us at support.eu@flowerturbines.com or visit our website at
