The alginate casing are used in making sausages and processed meat products. Casings have been referred as the oldest form of packaging materials for sausage. Casings determine the final size and shape of the sausage product. These alginate casings serve as processing molds, containers during handling and shipping, and as merchandising units for the display of sausages and meat products. The sausage production was limited to the number of available animal intestines, but due to the development of technology now they are made from the extract of brown algae, known as alginate casing. These coatings are edible in nature and are useful to extend the self-life of different fruits and vegetables.

These alginate casings are also used to enclose the sausages, which provide a good taste and texture to them. Alginate casings can be used differently as a film in food packing or as a fermenter for meat products. It also provides various benefits like reducing dehydration,

enhancing the product's appearance, and also controls respiration. Many key players and companies globally are coming up with various new formulations and products in the alginate casing market to cater to the increasing demand for naturally derived casings among consumers for . The [alginate casings market](#) is segmented into type, application, end-user, usage, and region. On the basis of type, the market is classified into basic, colored, and flavored. The flavored segment occupied the major share of the market in 2021 and is projected to maintain its dominance during the forecast period, owing to rising demand for flavored sausages among consumers.

Key Players:

FMC Corporation,

Promar,

Agersol Alignate,

Visko Teepak, Reiser,

Handtmann, F&D Technology,

Merck,

Qingdao Hyzlin Biology Technology Development Co. ,

JRS Group,

Hydroslo GmbH & Co. kg,

Vaess, Ceamsa,

D2 Ingredients, LP,

KIMICA

Also, the increasing popularity of vegans in the food market around the globe has pushed manufacturers to use edible casing and also to focus on the alginate-based edible casing. Depending on the application, it is bifurcated into meat, vegan, and fish. The meat segment occupied the major share of the market in 2021 and is projected to maintain its dominance during the forecast period, owing to higher demand for sausages and the production of various sausage flavors by market players. Depending on end user, it is bifurcated into food industry, and pet food industry. The food industry segment occupied the major share of the market in 2021 and is projected to maintain its dominance during the forecast period, owing to rising

population, which has led to higher demand for sausage and other meat products.

The increasing shift of consumers towards protein-based diets is making a positive impact on the alginate casing market across the globe. Also, alginate casings are a cost-effective alternative to other expensive natural casings owing to their low labor and production cost. Food product manufacturers are also focusing on naturally derived casings instead of animal casing owing to consumer inclination for vegan food products. Furthermore, busy and hectic life is expected to boost demand for ready-to-eat meat products and snacks which in turn is expected to boost the growth of the alginate casing market. . It also provides food with a crispy bite and soothing texture. These all factors collectively increase the demand for alginate casing. Depending on usage, it is bifurcated into halal, kosher, and others. The halal segment occupied the major share of the market in 2021, and is projected to maintain its dominance during the forecast period, owing to rising awareness among consumers regarding halal certification of food products, especially among Muslim meat product consumers.

In 2021, North America accounted for 42.3% of the global alginate casings market share and is expected to maintain its dominance during the forecast period. However, Asia-Pacific is expected to possess the highest CAGR of 13.6%, owing to the rising population and higher demand for sausage and meat products in the region. Moreover, during the time of COVID-19 pandemic, it was observed that almost all the sectors of the economy were adversely affected globally and the alginate casings market witnessed the same adverse effects due to the complete lockdown and the closure of the packaged food manufacturing industry thus leading to a negative impact on the market.
