"I am so excited to be the first in the Seattle area to bring the PicoWay® system to my patients. I have to say the Picoway is a major step forward in treating skin imperfections," said Heidi, Master Esthetician, Laser Specialist at Well Medical Arts. "As soon as this device became available, I knew I had to have it for our office" she added.

The PicoWay® laser treatment stimulates collagen at a deeper level by utilizing three distinct energy wavelengths to address specific skin concerns. In contrast, an IPL treatment employs a wider range of wavelengths. While IPL can be effective in certain cases, it may not be as safe for darker skin types and does not stimulate collagen in the same manner.
