Driving Forces: Construction Industry Demand

One of the primary drivers of the woodworking and paper machinery market is the escalating demand from the construction industry, particularly for wooden homes or wood-framed homes. Woodworking machinery plays a crucial role in processing components like cross-laminated timber (CLT) and laminated veneer lumber (LVL), essential in constructing wooden houses. In the US, for instance, the National Association of Home Builders (NAHB) reported

that 92% of new homes completed in 2021 were wood-framed, showcasing an 8% increase from the previous year. This increasing trend in the construction sector is anticipated to propel the woodworking and paper machinery market's growth in the foreseeable future.
