Company*

Medical Tourism Drives Market Expansion

The cosmetic lasers market has been buoyed by the rise of medical tourism. Increasingly, individuals seek better quality and cost-effective treatment options, driving the demand for medical tourism. This trend is particularly notable in cosmetic surgery medical tourism, where patients opt for better facilities and experienced doctors at economical prices. Notably, the surge in medical tourism saw 290,000 Americans traveling abroad for medical

procedures in 2020, with around 3% of Americans traveling internationally for medical reasons. This rise in medical tourism, especially in the cosmetic surgery domain, is anticipated to contribute significantly to the demand for cosmetic lasers.
