billion by 2031, growing at a CAGR of 3.9% from 2022 to 2031.

AMMUNITION
MARKET

OPPORTUNITIES AND
FORECAST,
2021 - 2031

Ammunition market is expected to reach \$31.7 Billion in 2031

Growing at a CAGR of 3.9%
(2022-2031)

Report Code: A09660, www.alliedmarketresearch.com

The global ammunition market is experiencing growth due to factors such as the rise in safety concerns and increasing shooting ranges. Furthermore, technological innovation has the capacity to transform the ammunition industry and provide corporations with a competitive aspect. For instance, using novel materials and production techniques can result in more advanced and more efficient ammunition that outperforms traditional ammunition. While there are many ways for companies to invest in R&D to develop more advanced and more effective ammunition, there also are challenges that must be examined.

Africa: Nigeria, Kenya, Morocco, Sudan, and the Rest of Africa

The pandemic disrupted the supply chains, which made it difficult for some ammunition manufacturers to obtain the raw materials they need to produce ammunition. This led to shortages in some areas and increased prices for ammunition. Some countries restricted the import and export of firearms and ammunition during the pandemic, which had an impact on the ammunition market.

COVID-19 also affected the demand for ammunition in the military and law enforcement sectors. The pandemic led to a shift in priorities of these organizations, with more resources being allocated to pandemic response and less to other areas such as training and operations in the military. This resulted in a decrease in demand for ammunition in these sectors.

Social distancing norms, closed borders, and production constraints, due to the pandemic, across various countries such as China, India, and the U.S. affected the global market.
