Rise in companion animal ownership, increase in need for streamlining daily tasks in veterinary hospitals, and surge in expenditure on animal health fuel the growth of the global veterinary software market. By product type, the veterinary practice management software segment held the major share in 2019. By region, on the other hand, Europe would register the fastest CAGR by 2027.

The global veterinary software market is analyzed across type, deployment, product type, practice type, end user, and region. Based on product type, the veterinary practice management

software segment contributed to nearly two-fifths of the total market share in 2019 and is expected to rule the roost by the end of 2027. At the same time, the veterinary imaging software segment would exhibit the fastest CAGR of 7.7% throughout the forecast period.

According to end user, the hospital or clinic segment accounted for the highest share in the global veterinary software market in 2019, as clinics or hospitals are primary users of veterinary software. In addition, presence of large number of veterinary hospitals or clinics as compared to laboratories is driving the growth of this segment. The increase in demand for veterinary practice management as well as veterinary imaging software by vet hospitals is further fueling the growth of this market.

Based on deployment, the on premise segment held the lion's share in 2019, generating more than two-thirds of the global market. The cloud segment, on the other hand, is projected to showcase the fastest CAGR of 7.8% from 2020 to 2027.

Impact of COVID-19 on Veterinary Software Market:

☐ The outbreak of Covid-19 led to increased demand for companion animals, since most of the people are working from home and they have adequate time to spend with their pets. This has been utterly advantageous for the veterinary software industry.

☐ At the same time, the global market for veterinary software is expected to boom even post pandemic, as the software offers custom client communications and telehealth & remote monitoring solutions.
