Catalysts of Growth: Rising Hospitalization Rates Due to Chronic Diseases

The surge in the prevalence of chronic diseases globally has led to an increased hospitalization rate, driving the growth of the intravascular catheters market. Intravascular catheters play a crucial role in chronic disease treatment by facilitating sample collection for tests and administering fluids, nutrients, and blood intake. Notably, Fresenius Medical Care, a German healthcare company, estimates that the number of individuals suffering from chronic

kidney failure is expected to rise from 3.7 million patients in 2020 to 4.9 million by 2025. This underscores the significant role of intravascular catheters in addressing the healthcare needs of patients with chronic diseases.
