# Oak Valley Hospital District's Success Story Unveiled

With i2i, Oak Valley Hospital District accomplished its quality goals and return on investment.

FRANKLIN, TN, USA, November 28, 2023 /EINPresswire.com/ -- In the heart of Oakdale, California, Oak Valley Hospital District has emerged as a beacon of healthcare excellence. Boasting a 150-skilled nursing bed facility and 35 general acute care beds, the district serves a dynamic community of 83,401. Faced with the challenge of reporting and improving Quality Program performance, the district sought a transformative solution.

Oak Valley Hospital District chose to partner with i2i Population Health for its i2iTracks solution. This innovative tool not only automated quality management and care coordination processes but also enabled Oak Valley to achieve a remarkable 100% in quality performance payments over five years for PRIME. Beyond metrics, the platform played a pivotal role during an unplanned system outage in 2021, with i2i Messaging ensuring uninterrupted communication. As Lillie Avant, Population Health Coordinator, puts it, "Every step of the way, they [i2i] have been there...making it easy and powerful for Oak Valley."

> *i2i has delivered significant value for Oak Valley Hospital District and allows our staff to focus on patient needs versus technology."*
>
> *David Rodrigues, VP of Administrative Services*

This success story highlights not only the tangible results achieved but also the collaborative journey between Oak Valley Hospital District and i2i Population Health. Remarkably, Oak Valley achieved a return on investment in less than six months, underscoring the efficiency and impact of this transformative partnership. Read the full story to delve into the details of this healthcare transformation.
