*It is consumed in various forms, including beverages, snacks, meal replacement, dessert, and protein-rich sports drinks.*

PORLAND, OR, UNITED STATES,  
November 28, 2023 /

EINPresswire.com/ -- The fast-paced lifestyle of individuals has forced them to seek convenient solutions. Growth in demand for convenience food has led the foundation for the [frozen pizza market](#). However, consumers want frozen pizzas that are healthier and have real and authentic food attributes. Frozen pizzas are today

perceived as premium food products. The different types include regular thin crust, extra thin crust, deep-dish, and others, such as classic/thick crust, stuffed crust, and rise crust. Health consciousness among the consumers has led to the growth in popularity of gluten free frozen pizza supplementing the market growth. Other factors such as increased disposable income, rise in standard of living, and rapid increase in number of large retail chains further fuels the market growth.

Frozen pizza consists of a flat round base of dough baked with vegetable or meat toppings. Pizza is one of the most popular foods in Europe and North America and are sold fresh or frozen either whole or in portions across the globe. Freezing preserves the texture, taste, and nutritional value of pizza for a longer duration.

Rise in demand for convenience is the key factor that drives the frozen pizza market. Other factors such as increased disposable income, rise in standard of living, and rapid increase in number of large retail chains supplement the growth of the market. Moreover, increase in popularity of gluten-free frozen pizza further fuels the market growth. Consumers' assumption

about the presence of high levels of sodium, fat, calories, and preservatives in frozen pizza has led to their lower sales in various developing countries. The addition of preservatives and other chemicals is perceived as a negative trait in the frozen pizza.

Major players, such as General Mills and Nestle, have enjoyed cost advantage amidst increasing cost of raw materials on account of operational excellence. As cost of raw materials would increase, players are expected to invest in R&D to develop advanced freezing technologies to reduce energy consumption and overall production cost, thereby increase in profit margins. For instance, the advancement of technology has led to the introduction of the quickest freezing technology such as impingement freezing, hydro-fluidization freezing, high-pressure assisted freezing, magnetic resonance-assisted freezing, and others. Freezing pizza with the help of liquid nitrogen also provides a major opportunity to the frozen pizza manufacturers, thus driving the market growth.
