

Creative BioMart Enlarged Its Offerings for Full Length Proteins

SHIRLEY, NY, UNITED STATES,

November 28, 2023 /

EINPresswire.com/ -- Creative BioMart, a leading provider of recombinant proteins and protein manufacturing techniques, today announced the expansion of its product offerings to include a comprehensive line of [full-length proteins](#) to meet the diverse needs of scientists worldwide.

Full-length proteins are proteins that have been produced in their entirety, including all of their native amino acid sequences. This is in contrast to truncated proteins, which are proteins that have had some of their amino acid sequences removed. Full-length proteins are essential for a wide range of research applications, including structural biology, protein-protein interactions, and drug discovery.

"We are thrilled to unveil our expanded portfolio of full-length proteins," said Linna, the chief marketing staff at Creative BioMart. "Our commitment to providing high-quality, innovative research tools has driven us to continuously enhance our offerings. This expansion reaffirms our dedication to empowering scientists with the resources they need to make groundbreaking discoveries."

Creative BioMart's full-length proteins are produced using the company's proprietary expression system, ensuring high yields of proteins with exceptional purity and activity. The proteins are meticulously characterized to guarantee their integrity and functionality, making them ideal for a wide range of research applications.

Recognizing the diverse needs of its customers, Creative BioMart now offers over 46,000 kinds of full-length proteins from various species like human, mouse, rat, zebrafish, Human immunodeficiency virus 1, and with different tags like flag, GFP, BTN, C-hFc, C-Flag, Biotin, C-His, GST, etc.

Some of the products include: [Recombinant Human EGF Protein](#), Active Recombinant Human FGF4 Protein, Recombinant Human SLC30A8 Protein, His-tagged, Recombinant Mouse ZFYVE1

Protein, Recombinant Rat DHODH Protein, Recombinant Rat DHODH Protein...

Creative BioMart's commitment to quality extends beyond its products to encompass comprehensive customer support. Their team of experienced scientists is dedicated to providing expert advice and guidance to assist researchers in selecting the appropriate full-length proteins for their specific needs.

"We believe that strong customer support is essential for ensuring the success of our customers' research endeavors," said James, Customer Success Manager at Creative BioMart. "Our team is always available to provide personalized assistance and address any questions or concerns our customers may have."

Of note, according to Linna, Creative BioMart offers 20% off on all products including native proteins, gmp proteins, assay kits, chromatography, [lectins](#), and 10% off on all services like protein expression, protein labeling, protein interaction analysis, until the end of 2023.
