

NewWorld and Bank Negara Indonesia (BNI) continue digital transformation initiatives

LONDON, ENGLAND, November 29, 2023 /EINPresswire.com/ -- The BI Council announced today that Bank Negara Indonesia (BNI) has successfully completed the transformation of its operations through NewWorld AI's automated procedures. The bank sought to upgrade its banking automation solution to support key business objectives: customer experience, innovation and a performance culture. Bank Indonesia used NewWorld AI intelligent automation platform technology to automate 200 processes and accelerate operational transformation.

Doni Primanto Joewono, Deputy Governor of Bank Indonesia, said: "Thanks to NewWorld AI's unparalleled support and our capabilities at Bank Indonesia, we were able to transform our operations at scale in a very short period of time. With a stronger automated infrastructure, pipeline and delivery. Bank Indonesia's employees are now fully invested in intelligent automation due to the benefits they have seen over the past six months. We are excited about the transformative results we can achieve next."

To date, the bank has automated eight operational areas, including corporate payments, ATM and cash management, consumer finance, retail, governance and operational excellence. The results achieved by Bank Indonesia in just six months demonstrate the significant transformational value that automation can deliver when you have the right culture and support.

New World Ai Limited

New World Ai Limited

NewWorld AI is a company that builds full-stack robots in the era of large-scale artificial intelligence models: [New World Ai Limited](#) is a top artificial intelligence software development company based in the UK and a leader in the digital automation industry. At NewWorld AI, they bring together the world's best and brightest IT talent, who work with customers around the world to create world-class digital experiences.

New World Ai Limited

Since its establishment, NewWorld AI has gathered more than 500 full-stack technical personnel and 12,000 employees. They develop cutting-edge automation software solutions for select startups and enterprises, helping them achieve digital transformation.
