

USD 43.8 Bn Recommendation Engine Market to Reach by 2031, at 32.1% CAGR- Says Allied Market Research | Growth Prospects

Recommendation engine is a data filtering technology that allows marketers to provide customers with relevant product recommendation in real time.

PORTLAND, PORTLAND, OR, UNITED STATE, November 29, 2023

/EINPresswire.com/ -- The global [Recommendation Engine Market](#) is driven by factors such as rise in adoption of digital technologies, increase in focus enhance customer experience, and increase in use of the deep learning technology in AI

recommendation engine solution. However, lack of skills & expertise and concerns over accessing customers' personal data hamper the recommendation engine market growth. On the contrary, increase in demand to analyze large volume of data is expected to offer remunerative opportunities for expansion of the recommendation engine market during the forecast period.

According to the report, the global recommendation engine industry generated \$2.7 billion in 2021, and is anticipated to generate \$43.8 billion by 2031, witnessing a CAGR of 32.1% from 2022 to 2031.

Covid-19 Scenario:

□ The COVID-19 pandemic had positively impacted the growth of the recommendation engine market, owing to increase in demand for digitization and the appearance of new e-commerce platforms.

□ Moreover, with the increase in fear of getting infected, people were compelled to make the shift from physical stores to online shopping. This shift resulted in the growing demand for

recommendation engine market.

By type, the collaborative filtering segment accounted for the highest share in 2021, garnering more than two-fifths of the global recommendation engine market revenue and is expected to maintain its lead in terms of revenue during the forecast period, owing to increase in demand for reliable recommendation engines from e-commerce platforms to enhance their customers' shopping experience by suggesting products based on their tastes and preferences. However, the hybrid recommendation segment would cite the fastest CAGR of 33.8 from 2022 to 2031, owing to surge in usage of hybrid systems to improve the effectiveness of end-user solutions.
