Autoimmune disease is a condition which results in impaired function and the destruction of tissue, caused by an immune reaction. In autoimmune conditions abnormal antibodies are produced which attack the body's own cells and tissues. The increasing incidences of autoimmune conditions like rheumatoid arthritis, type I diabetes, etc. have created the need for autoimmune drugs. The rising awareness for the treatment, increasing incidences of autoimmune diseases due to urban lifestyle and affordable treatments, are some of the key factors that drive the growth of the Autoimmune diseases treatment market in the analysis period.
