

# ENSER Corporation Celebrates One-Year Anniversary of the Arnone Foundation Scholarship

*Empowering Dreams: ENSER Corporation Honors the Arnone Foundation Scholarship at Temple University's Fall Scholarship Celebration*

PHILADELPHIA, PA, UNITED STATES, December 5, 2023 /EINPresswire.com/ -- [ENSER Corporation](#), a leading name in engineering solutions, proudly commemorates the one-year anniversary of the Arnone Foundation Scholarship by highlighting the foundation's origin and honoring the first Scholarship recipient. This scholarship, dedicated to supporting students pursuing Mechanical Engineering degrees who have faced hardships during their academic journey, such as bereavement, illness, or financial burdens, has left a profound impact on the lives of deserving individuals.

“

The Arnone Foundation Scholarship was established in memory of my brother Robert and aims to provide opportunities for students who have faced hardships similar to those encountered by my family.”

*ENSER's President, Marco Arnone*

"The Arnone Foundation Scholarship was established in memory of my brother Robert and aims to provide opportunities for students who have faced hardships similar to those encountered by my family," said Marco Arnone, President of ENSER Corporation.

The foundation's impetus was a desire to honor the memory of ENSER's former President Robert Arnone, who, despite facing significant challenges, pursued his passion for Mechanical Engineering. This scholarship serves as a tribute to his resilience and as a means to help students navigating comparable hardships.

Additionally, the foundation is deeply rooted in a family legacy at Temple University, commencing with Mario Arnone, who earned a BSME in 1961. His academic accomplishments laid the groundwork for the family's commitment to this field. Following in their father's footsteps, Robert graduated in 1984, Marco in 1988, and Mario's grandson, Nicholas, in 2021, symbolizing multiple generations devoted to advancing education in the field at Temple University. This multi-generational connection underscores the family's enduring commitment to advancing education in Mechanical Engineering.

ENSER Corporation is thrilled to announce Mr. Jose Ortiz Ayllon as the first recipient of this prestigious scholarship. Mr. Ayllon, a senior majoring in Mechanical Engineering at Temple University, embodies the dedication that resonates with the scholarship's mission. His journey reflects the ethos of support, as he overcomes obstacles on the path to a Mechanical Engineering degree at [Temple University College of Engineering](#).

In a heartfelt letter, Mr. Ortiz Ayllon expresses gratitude for the financial support, shedding light on the challenges he has overcome as the son of a single mother raising six boys. Despite facing a three-hour daily commute and working year-round to fund his education, Mr. Ayllon remains steadfast in his commitment to his studies and future career in Mechanical Engineering.

The recent Fall Scholarship Celebration, hosted by Temple University College of Engineering, provided an enriching platform that brought together student scholars, donors, and distinguished guests. The vibrant atmosphere of the reception dinner, featuring not only Mr. Ayllon but also numerous other scholarship recipients, underscored the significance of such initiatives.

The event also captured moments with the esteemed retired Professor Dr. Cohen and alumnus Mr. Dan Cassidy, who graduated in 1988 and continues to support Temple University College of Engineering.

Reflecting on the one-year anniversary, ENSER Corporation extends sincere congratulations to all student scholars and expresses gratitude to the generous donors who make these opportunities possible. The company reaffirms its commitment to fostering education and supporting the next generation of engineers through initiatives like The Arnone Foundation Scholarship.
