Both Neurotoxins and fillers can cause temporary side effects like bruising and swelling and can take time to see optimal results.

PLANNING GUIDE:

Neurotoxins Treatments

- Hanukkah: Mid-November
- Christmas: Mid to late November
- New Year's Eve: Early December

Filler Treatments

- Hanukkah: Late November to early December
- Christmas: Early December
- New Year's Eve: Mid-December

This timing ensures that any minor bruising or swelling has time to subside, and the full effects

of the treatment are visible.

Dr. Peled emphasizes the importance of personalized care and advises clients to seek professional consultations. This ensures that treatments are tailored to meet individual aesthetic goals and needs, leading to the best possible outcomes. Following the aftercare instructions provided by a practitioner will help minimize these effects. It's also important to note that individual responses to these treatments can vary.

"With these treatments, it's not just about looking good, but also about feeling great," added Dr. Peled. "Our approach is to offer personalized care that aligns with our client's unique beauty goals, especially during the joyous holiday season."

Dr. Peled is committed to providing high-quality, safe, and effective cosmetic treatments. Their team of experts is dedicated to helping clients achieve their desired results with the utmost care and professionalism.
