Covid-19 Scenario-

The outbreak of the pandemic gave way to the shutdown of maximum operations including manufacturing and distribution across several industries. This led to a steep decline in demand for phenolic insulation from the construction industry, thus impacting the market growth negatively.

However, as governments around the world started encouraging businesses in the construction sector to resume their operations, the phenolic insulation market also got back on track. The global phenolic insulation market is analyzed across type, end-use industry, and region. The report takes in an exhaustive analysis of segments and their sub-segments with the help of tabular and graphical representation. Investors and market players can benefit from the breakdown and devise strategies based on the highest revenue-generating and fastest-growing segments stated in the report.
