Agribots Address Labor Shortages and Propel Efficiency

The escalating demand for advanced agricultural tools, coupled with a shortage of labor in numerous countries, has catalyzed the adoption of agriculture robots, commonly known as agribots. These robots play a pivotal role in various farm activities, including pruning, weeding, and pesticide and herbicide spraying. Connected to tractors, agribots facilitate tasks such as spraying water, seeds, pesticides, nutrients, and harvesting. An illustrative example is the Energid Citrus Picking Robot System, capable of picking an orange every two seconds, significantly enhancing productivity and mitigating the reliance on manual labor.
