“

The foundation, structure, and building exterior contractors market is expected to grow to \$1,384.36 billion in 2027 at a CAGR of 4.7%.”

*The Business Research  
Company*

Key Growth Drivers

**Urban Population Surge:** The foundation, structure, and building exterior contractors market is fueled by the rapid growth of the urban population, leading to increased demand for new residential and commercial land. The UN World Urbanization Prospects report predicts that over 60% of the global population will be residing in cities by 2050. This urbanization trend presents significant opportunities, especially in Asian countries like Indonesia, Vietnam, and the Philippines. South Asia, as per the World Bank, is expected to witness a growth of 250 million in urban population by 2030, boosting demand for new infrastructure and driving the foundation, structure, and building exterior contractors market.

**Building-Integrated Photovoltaic (BIPV) Technology:** Contractors are embracing building-integrated photovoltaic (BIPV) glazing technology for electricity generation. BIPV systems incorporate solar cells or modules into building elements, allowing various components like roofs, facades, windows, and more to generate solar electricity. This technology contributes to sustainable practices, enabling buildings to self-generate electricity from clean energy sources. Companies like AGC Inc., Avenston Group, BELECTRIC, BiPVco, and Canadian Solar are actively involved in BIPV development.
