

Baby Blendy Continues to Offer its Anti-Colic Portable Baby Bottle Blender in Four Silicone Nipple Variations

The revolutionary baby bottle blender that mixes baby formula, cereals, and breast milk in seconds, is available in different nipple variations.

MIAMI LAKES, FLORIDA, UNITED STATES, December 6, 2023 /EINPresswire.com/ -- Representatives with Florida-based [Baby Blendy LLC](#) announced that it continues to offer four different nipple variations for its baby bottle blender.

"We offer four variations of nipples for our baby bottle blender," said Osmay Gonzalez, spokesperson for Baby Blendy LLC, a member of the Juvenile Products Manufacturers Association. "The nipple types are Slow Flow, Medium Flow, Fast Flow, and Sippy Spout."

Osmay went on to add that breast like nipples simulate mom's natural shape, making it easier to combine breast and bottle feeding.

"The nipples are scientifically designed to be more natural for comfortable, stress-free feeding for baby and parents."

Baby Blendy is a doctor-recommended, anti-colic portable baby bottle blender that contains a mixer inside, which mixes any baby formula, cereals, and breast milk.

Baby Blendy, which was created and specifically designed to ease the complications of having to shake an ordinary bottle, comes in six-ounce, eight-ounce, and ten-ounce bottle sizes.

Osmay noted that the Baby Blendy bottle minimizes swallowing of air, thereby reducing post-feeding discomforts. The product thoroughly blends and mixes all chunks of the formula, ensuring that the baby receives all of the nutrients he or she should receive.

"Simply add formula or breast milk and push the button and the magic begins as the blender mixes, creating a powerful cyclone swirl that does all the mixing for you, hands-free, which helps

reduce foaming and air bubbles within the milk," Osmay stressed, before adding, "When breast milk is stored, the milk separates into layers, fats will rise to the top. Our bottle will help mix your baby's breast milk thoroughly. This baby bottle is ideal for use when on the go or at home to fix your baby a bottle of milk, with the solution being thoroughly blended effortlessly."
