About LearnX Live

The LearnX® Awards have been in practice since 2008. As with every year, the LearnX® Awards standings continue to surpass expectations with a surge in high-calibre applications from around the world. The LearnX® Awards are an international and professional awards program that recognizes multiple fields of learning and talent development throughout the corporate, education, public, and not-for-profit sectors worldwide. Award applications are objectively assessed against set criteria by independent judges via a points system scorecard – on merit – not comparatively. This quality-driven process ensures an equal playing field and an opportunity for success with each application.

A Platinum Award is the highest accolade (7 stars), while a Bronze Award is the lowest (3 stars). Each year the LearnX® Awards uncover the most innovative projects and technology solutions that deliver best practice and value to enterprises of various structures and sizes. Many of these experiences are then selected through consultation and shared with the wider community

during the LearnX® Summit & Awards Show, also branded as 'The Main Event' by industry. The LearnX® objective is also to shine a light on the talented teams and individuals involved in these works, and the enterprises that support them.

The LearnX® Awards are the most prized accolade in the world
