

# Sun Energy Today Offers Solar Leases with No Required Credit Score

*More households can go solar — No worries.*

SCOTTSDALE, AZ, UNITED STATES, December 7, 2023 /EINPresswire.com/ -- Sun Energy Today has the goal of helping more households benefit from clean, sustainable solar energy. Their [solar leasing programs](#) focus on saving homeowners money right away and providing the easiest transition from purchasing utility power to using solar power. The leasing company pays for the installation of the solar system, and the homeowner agrees to make lease payments for 7 to 25 years.

While leasing means that homeowner does not get the federal or state tax credit, the leasing company benefits from them and can pass on the savings in the lease, allowing it to structure lower monthly payments. With a solar lease, Sun Energy Today owns the system on the roof but the customer gets the benefit of electricity savings. The customer benefits by getting superior panels that will yield greater solar savings.

Sun Energy Today makes the solar lease very appealing. There are no out-of-pocket costs and no credit report requirement which makes the program

Sun Energy Today

Sun Energy Today No Credit Score

available to more homeowners who might not be able to purchase or finance a solar panel system. With Sun Energy Today's lease there are flexible financing terms that range from 7 to 25 years — the homeowner is simply 'renting' the system.

A solar lease is worry free in that the maintenance of the solar system is the responsibility of Sun Energy Today. Sun Energy offers the best-in-class warranty. In the rare event that something goes wrong, the company will fix it — guaranteed for 25 years! And should the homeowner decide to sell the home, the lease can be assigned to the new owner with paperwork that is handled by the company.

Sun Energy Today Couple Going Solar

“Sun Energy Today is made up of local experts in quality solar products and exemplary customer service,” said Alex Herrera, CEO of Sun Energy Today. “We have the stated goal to help as many households as possible enjoy the savings of clean sustainable solar energy.”
