

# New Auto Typer Tool To Simulate Realistic Typing In Google Docs Released

*Undetectable.ai's newest Chrome Extension for Google Docs*

SHERIDAN, WY, UNITED STATES, December 8, 2023 /EINPresswire.com/ -- [Undetectable.ai](https://undetectable.ai) is proud to announce the [Human Auto Typer Tool](#) for Google Docs.

This new Chrome extension makes pasted texts simulate natural human typing patterns and ensures the organic appearance of document revision histories.

Developed after extensive research into human typing behaviors, the Human Auto Typer is tailored for users seeking to maintain the illusion of manual typing in Google Docs.

It can be used for presentations, and to privately hide the copy and pasting of text from other document software.

The Human Auto Typer tool was developed and tested on bypassing draftback, origin, and originality, successfully passing all 3 with human typing patterns.

## Detailed Features and Advantages

**Advanced Human-like Typing Simulation:** The tool's algorithm replicates natural typing patterns, complete with errors, and intermittent breaks with unparalleled accuracy.

**AI Writing Detection Evasion:** Expertly bypasses advanced typing detection tools, offering peace of mind for users concerned about the authenticity of their documents.

**Dynamic Typing Pattern Technology:** Generates believable typing patterns, ensuring each document's revision history appears genuinely hand-typed.

**Pricing and Availability:**

The Human Auto Typer Tool is competitively priced at \$5 per month, with a complimentary subscription available to current Undetectable.ai subscribers.

Installation is straightforward: download the extension from the Chrome store, open a Google Doc, and initiate the tool to begin the human-like typing simulation.

#### About Undetectable AI:

Undetectable.ai is an artificial intelligence platform that provides users with AI-powered software tailored towards discretion, and maintaining human-like qualities. Undetectable.ai lets users detect AI content, humanize AI content, and now, simulate realistic typing.
