The portable generator provide electrical power where electricity is unavailable or required for temporary purposes. A portable generator is a gas- or diesel-powered device designed typically to be an electrical generator that measures power in hours of use instead of days. Portable generators provide electricity by running a gas-powered engine that turns an on-board alternator, which generate electrical power. These generators provide temporary, easily transportable electric power, and are very commonly found in daily operation on all work and leisure sites.
