The rise in demand for big data analytics, enterprise-wide need for scalable and flexible database solutions, and growth in adoption of cloud computing technology are expected to drive the global NoSQL market growth. However, the high complexities of administrating NoSQL databases and the potential threat of data-related inconsistencies are expected to hinder market growth. Furthermore, the rise in adoption of advanced technologies such as AI & ML offers lucrative market opportunities for the market players.

The NoSQL market is segmented on the basis of type, application, industry vertical, and region.

On the basis of type, it is categorized into key-value store, document database, column-based store, and graph database. On the basis of application, it is divided into data storage, mobile apps, data analytics, web apps, and others. The data storage segment is further sub-segmented into distributed data depository, cache memory, and metadata store. On the basis of industry vertical, it is categorized into retail, gaming, IT, and others. On the basis of region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

If you have any questions, Please feel free to contact our analyst at:

On the basis of industry vertical, the IT segment accounted for the largest share in 2022, contributing to less than two-fifths of the NoSQL market revenue, owing to the development of digital technologies in IT sector. However, the gaming segment is projected to manifest the highest CAGR of 35.4% from 2023 to 2032. The surge in the implementation of automation trends and the increase in utilization of digital technology in this sector is expected to provide lucrative opportunities for the market.

On the basis of application, the web apps segment accounted for the largest share in 2022, contributing to more than one-fourth of the NoSQL market revenue, owing to growth in the usage of website-based solutions in several industries. However, the mobile apps segment is expected to portray the largest CAGR of 31% from 2023 to 2032 and is projected to maintain its lead position during the forecast period. It provides several advantages such as reducing costs, supporting business, and effectively controlling the business environment in the organization.

On the basis of type, the key-value store segment held the highest market share in 2022, accounting for less than two-fifths of the NoSQL market revenue, and is estimated to maintain its leadership status throughout the forecast period. This is attributed to the high scalability and the ability to support multiple data models on a single database with faster access would continue driving its application. However, the document database segment is projected to manifest the highest CAGR of 29.0% from 2023 to 2032, as these database services help to reduce the time and costs associated with optimizing systems in the initial phase of deployment.

Enquiry Before Buying: <https://www.alliedmarketresearch.com/purchase-enquiry/640>

On the basis of region, the North America segment held the highest market share in terms of revenue in 2022, accounting for less than two-fifths of the NoSQL market revenue. The increase in the usage of NoSQL solutions in businesses to improve businesses and the customer experience is anticipated to propel the growth of the market in this region. However, the Asia-Pacific segment is projected to manifest the highest CAGR of 26.8% from 2023 to 2032. Countries such as China, India, and South Korea are at the forefront, embracing digital technologies to enhance their effectiveness and competitiveness, further expected to contribute to the growth of the market in this region.

The report analyzes the profiles of key players operating in the NoSQL market such as Aerospike Inc., Couchbase Inc., IBM Corporation, Neo4j, Inc., Objectivity, Inc, Oracle Corporation, Progress Software Corporation, Riak, ScyllaDB, Inc. and Apache Software Foundation. These players have adopted various strategies such as collaboration, acquisition, and product launch to increase their market penetration and strengthen their position in the NoSQL market.

## COVID-19 Scenario

□ The NoSQL market witnessed stable growth during the COVID-19 pandemic, owing to the dramatically increased dependence on digital devices. The surge in online presence of people during the period of COVID-19 induced lockdowns and social distancing policies fueled the need for NoSQL solutions.

□ In addition, with the majority of the population confined in homes during the early stages of the COVID-19 pandemic, businesses needed to optimize their business operations and offerings to maximize their revenue opportunities while optimizing their operations to support the rapidly evolving business environment, post the outbreak of the COVID-19 pandemic.

Thanks for reading this article, you can also get an individual chapter-wise section or region-wise report versions like North America, Europe, or Asia.

If you have any special requirements, please let us know and we will offer you the report as per your requirements.

Lastly, this report provides market intelligence most comprehensively. The report structure has been kept such that it offers maximum business value. It provides critical insights into the market dynamics and will enable strategic decision-making for the existing market players as well as those willing to enter the market.

## About Us:

Allied Market Research (AMR) is a market research and business-consulting firm of Allied Analytics LLP, based in Portland, Oregon. AMR offers market research reports, business solutions, consulting services, and insights on markets across 11 industry verticals. Adopting extensive research methodologies, AMR is instrumental in helping its clients to make strategic business decisions and achieve sustainable growth in their market domains. We are equipped with skilled analysts and experts and have a wide experience of working with many Fortune 500 companies and small & medium enterprises.

Pawan Kumar, the CEO of Allied Market Research, is leading the organization toward providing

high-quality data and insights. We are in professional corporate relations with various companies. This helps us dig out market data that helps us generate accurate research data tables and confirm utmost accuracy in our market forecasting. Every data company in the domain is concerned. Our secondary data procurement methodology includes deep presented in the reports published by us is extracted through primary interviews with top officials from leading online and offline research and discussion with knowledgeable professionals and analysts in the industry.
