Heart block is the disease of cardiovascular electrical system, which controls the rhythm and rate of the heart. Heart block mainly occurs due to disturbed and slowed electrical signals across the heart. Heart block is categorized in two types on the basis of working of the cardiovascular electric signals; partial heart blocks and complete heart blocks. In the partial heart blocks, the cardiovascular electrical signals are partially blocked i.e., their influx to heart is delayed. In complete heart blocks, the signals transmission is blocked completely.

Segmentation:

By Type Of Heart Block:

First-degree heart blocks

Second-degree heart blocks
