

Bob Zeidman Releases “Election Hacks,” A First-Hand Account of His Investigation into 2020 Election Fraud Claims

LAS VEGAS, NV, UNITED STATES,
December 11, 2023 /

EINPresswire.com/ -- Bob Zeidman, the software engineer who became famous for debunking election fraud “proof” of pillow salesman Mike Lindell, just published his first-hand account of the story, entitled [Election Hacks](#).

Lindell, the MyPillow magnate, has been publicly declaring he has proof of voting machine tampering that threw the 2020 election from Donald Trump to Joe Biden. Zeidman, who invented the field of software forensics, was invited by Lindell in 2021 to examine and verify the alleged proof. What he found was bogus data and manipulated results. This is the story of Zeidman’s successful \$5 million lawsuit against Lindell and his uncovering of a scandal leading to some of the top

political leaders and advisors in America. See Zeidman v. Lindell Mgmt., 23-cv-1433 (JRT/DJF), (D. Minn. Jun. 22, 2023) (“23-cv-1433 (JRT/DJF) 23-cv-1759 (JRT/DJF”).

Election Hacks is not just an important book about the cries of a stolen 2020 presidential election, it is also a warning for the 2024 election and all future elections. It is a personal story of a man who found the truth and pursued it against the odds. It’s a technological mystery, a courtroom drama, and a character study of fanatics and their enablers. It’s about human nature and how people can so easily be led astray. And it’s about standing up for the truth, even when that truth may turn out to belie your beliefs and alienate your friends.

About the Author:

Bob Zeidman is the creator of the field of software forensics and the founder of several
