Personalized Learning for Future Success

TS4U's unique program breaks away from traditional cohort models, offering a highly personalized, project-centric learning experience. Students can enroll at any time and progress at their own pace, focusing on real-world projects that prepare them for the demands of the tech industry. This personalized approach ensures that every participant graduates with the skills and confidence to secure a six-figure salary.

A Commitment to Accessibility and Excellence

Understanding the financial barriers faced by many, TS4U offers a 'Pay Later, Start Now' initiative, emphasizing its commitment to accessible education. Students receive unparalleled support from the dedicated TS4U team, available 24/5, to guide them through every step of their journey.

Empowering Students for a Bright Future

The boot camp's student-centric, outcome-oriented approach has already shown remarkable results. Participants report heightened excitement and productivity, as they are not just learning but actively applying their knowledge in practical scenarios.

A Thought Leader in Tech Education

Mr. Ahmad's recent blog post compares traditional cohort-based learning and the unique benefits of TS4U's 1:1 private boot camp. His insights highlight how this innovative model combines the advantages of session-based cohorts with a personalized touch, ensuring each student's journey is as unique as their career goals.

"

Six Figure is easier than ever; in a strategic partnership with Stride Funding, TS4U IT Bootcamp now offers students the flexibility to enroll conveniently anytime."
Join Anytime, Earn First, Pay Later!

Led by the visionary Mr. Ahmad, TS4U IT Engineering Bootcamp is redefining the tech education landscape. With a mission to transform individuals from non-tech backgrounds into thriving tech professionals, TS4U stands out as a beacon of innovation and personalized learning.

Transformative Learning for Diverse Backgrounds

Mr. Ahmad's journey in revolutionizing tech education focuses on tailoring learning experiences to individual needs, ensuring a path to consistent growth and lucrative work-from-home opportunities. TS4U's partnership with Stride Funding and Climb Credit fortifies this vision, supporting the unique 1:1 learning model that prioritizes student outcomes.

Expanding Horizons with New Bootcamps

TS4U is excited to launch three specialized bootcamps aimed at existing professionals seeking career advancement: ReactNative Mobile App Development, Desktop App Development, and Software Architect Training. These intensive programs, ranging from 40 to 70 hours, leverage NodeJS technology and are designed to impart complex concepts quickly, utilizing TS4U's internal

applications and services for a practical, hands-on approach.

Impressive Placement Records and Innovative Approaches

Throughout and post-pandemic, TS4U has successfully transitioned hundreds from varied backgrounds - including immigrants, college students, underpaid workers, and stay-at-home moms - into high-paying tech roles. The new 1:1 IT boot camp model offers unparalleled flexibility, allowing students to learn at their own pace with round-the-clock support from coaches and mentors.

Agile Scrum-Based Learning and Real-World Experience

Each student's journey is enhanced by agile scrum methodologies, encompassing diverse learning materials, hands-on experience, and numerous mock technical interviews. This comprehensive approach builds immense confidence, backed by a repository of over 1000 practical interview questions gathered from 45+ years of combined mentor experience at TS4U.

Internship Opportunities and Industry Connection

Interview Assistance
