

Passwordless with the Face: Hummingbirds AI Unveils GuacamoleBrowser at AI Cyberwar Event

Leading Innovator in Vision AI, Hummingbirds AI, surprises AI Cyberwar Attendees with the Launch of GuacamoleBrowser, Paving the Way for a Passwordless Future

MIAMI, FL, USA, January 11, 2024

/EINPresswire.com/ -- [Hummingbirds AI](#), a leading innovator in the field of vision AI and cybersecurity, is thrilled to announce the launch of its latest product, Guacamole Browser, at the [AI Cyberwar](#) event. This surprise unveiling was attended by senior executives, thought leaders, and AI enthusiasts.

The graphic features a photograph of a young girl with curly hair smiling at a computer screen. To her right, another person is partially visible, also looking at a screen. In the bottom right corner of the photo is a circular logo with a stylized face. Below the photo, the text 'GUACAMOLEBROWSER' is displayed in a bold, sans-serif font, with 'GUACAMOLE' in white and 'BROWSER' in orange. Underneath this, a smaller line of text reads: 'The world's first Secure Shared Web Browser that automates switching browsing profiles so that the users continue where they left off when they return to the shared device'. At the bottom of the graphic, the text 'GuacamoleBrowser, Making Web and Applications Passwordless' is written in a white, sans-serif font.

GUACAMOLEBROWSER

The world's first Secure Shared Web Browser that automates switching browsing profiles so that the users continue where they left off when they return to the shared device

GuacamoleBrowser, Making Web and Applications Passwordless

Guacamole Browser is the world's first Secure Shared Web Browser that automates switching browsing profiles. This revolutionary product is designed to address the challenges faced by organizations where multiple users share the same device. It eliminates the need for repetitive authentication, ensuring a seamless and efficient user experience.

The patent-pending Guacamole's continuous facial-authentication technology powers Guacamole Browser. This technology ensures that all network applications using a browser for access preserve work progress and session status. When users return to the shared device, they can continue where they left off, with their work automatically saved and the software they use switched to their appropriate profile.

Guacamole Browser is not just about convenience; it's about personalization, security, and privacy. It ensures every authorized user of a shared device has access to their own private and secure workspace, complying with security requirements.

Sara Zargaran, co-founder and Chief Speed Officer of Hummingbirds AI said, "We listened to our customers, from dialysis centers in Tampa to K-12 schools in the US and nine other countries. They shared the same pain point: access to applications without the hassle of passwords for

users, and also the high cost of password support for IT teams. Our team was able to release the product four weeks ahead of schedule. I'm so proud of our team, and also the customers that put their trust in us."

Nima Schei, MD, Founder and Chief Guacamole Maker at Hummingbirds AI, said, 'In an environment where companies are struggling with macroeconomy, we decided to think long term, skip the noise, and put more and more fuel into innovation. This is because technology doesn't stop, and we are here to make a profound impact in authentication, and to restore trust in a digital world that faces ever-increasing cyber threats.'

Ehsan Foroughi, the Technology leader at Hummingbirds AI suggested that 'Great technologies are built with all of the complexity behind the scene to delivery simplicity to users. While the experience seems extremely simple, there is a lot happening behind the scenes to make that a reality.'

The potential use cases for Guacamole Browser are vast, including healthcare facilities, educational organizations, service/reception desks in various industries such as financial institutions, retail, and industrial settings.

About Hummingbirds AI: Hummingbirds AI is a pioneer in vision AI, committed to creating innovative solutions that address real-world challenges. With a focus on security, privacy and user experience, Hummingbirds AI is shaping the passwordless future.
