

Fintech Technologies Market Expected to Reach \$698.48 Billion By 2030: Allied Market Research

NEW CASTLE, DELAWARE, UNITED STATES, December 13, 2023

/EINPresswire.com/ -- According to the report published by Allied Market Research, the global [fintech technologies market](#) size was valued at \$110.57 billion in 2020, and is projected to reach \$698.48 billion by 2030, growing at a CAGR of 20.3% from 2021 to 2030. The report offers a detailed analysis of changing market trends, top investment pockets, regional landscape, major segments, value chain, and competitive scenario.

Convenience services & maintenance of transparency in terms of financial inclusions and integration of advanced technologies drive the growth of the global fintech technologies market. However, privacy & security concerns with massive shift of consumer data and conflicting regulations across different jurisdictions hinder the market growth. On the other hand, expansion of offerings in developing economies with growth in the middle-class segment, rise in literacy level, rapid urbanization, and increase in tech-savvy youth generation presents new opportunities in the coming years.

COVID-19 Scenario:

The [demand for fintech technologies](#) increased with surge in usage and adoption of online & digitalized financial products among consumers across the world. In addition, fintech providers have been consolidating their capital and funding for technologies from investors and lenders.

Fintech innovations are coming into picture to reduce the cost of services, making financial institutions possible to reach more people and eliminate the need for face-to-face interactions

during the pandemic.

The report offers detailed segmentation of the global fintech technologies market based on deployment mode, application, technology, end user, and region. Based on deployment mode, the on-premise segment accounted for the highest market share in 2020, contributing to nearly three-fifths of the total share, and is projected to maintain its leadership status during the forecast period. However, the cloud segment is expected to register the highest CAGR of 21.3% from 2021 to 2030.
