

# The Role of AETHEION® in Mitigating Oxidative Stress Revealed

*Clinically proven: AETHEION® Redox technology is a safe and effective way to reduce oxidative stress using essential minerals to bring vitality to the skin.*

PUERTO VALLARTA, JALISCO, MEXICO, December 14, 2023 /EINPresswire.com/ -- AETHEION®, a leading skin care brand, offers professional cosmetic solutions to combat oxidization and revitalize the skin. The innovative formulations contain a patent-pending Redox technology, which harnesses the power of critical minerals such as Zinc, Copper, and Magnesium.

Oxidative stress caused by free radicals is a common concern in skincare. Its accumulation affects the appearance of the skin since daily aggressors can injure the body's natural defensive mechanisms to fight aging.

The Redox technology is a potent free radical scavenger that can reduce skin oxidation damage and support healthy skin function based on the following studies.

[Clinical trials](#) demonstrated the benefits of two of the most popular products AETHEION® offers: AETHEION® ZC30 AntiAging Cream and 2+ Topicals® Nutritional Lotion. Both displayed positive skin luminosity, firmness, tone, and hydration outcomes.

In another study, the AETHEION® Minerals (Zinc, Copper, and Magnesium) used in various formulations proved to have an impressive [oxidative reduction potential](#) (ORP) value of 461.9 Units  $\mu$ V. This value indicates the solution's ability to gain electrons from new species, reducing oxidation and promoting healthier, youthful-looking skin.

Furthermore, the ZCM 65 Synergistic Lotion boasts an exceptional [Total Antioxidant Capacity](#) (TAC) value of 176.0. This high TAC value further enhances the lotion's ability to neutralize harmful free radicals, providing comprehensive antioxidant protection for the skin.

The cosmetic system offers a range of products to protect, treat, condition, and nurture the skin, along with some hair solutions to increase the vitality of your appearance. Throughout the year, AETHEION® had monthly promotions to raise awareness and allow users to experience the benefits of their Redox Technology.

AETHEION® delivers topical supplements to help nourish the skin. It is committed to client

satisfaction and offers a support structure for its use. There are different series, each designed to help alleviate various concerns and provide high-quality ingredients to maximize the outcomes.

With continued use, users can expect to experience improved skin vitality, reduced signs of aging, and a rejuvenated complexion.
