Particle Therapy Market Top Key Players:

IBA Worldwide, Mevion Medical Systems, Varian Medical Systems, Sumitomo Heavy Industries Ltd, Hitachi Ltd, Toshiba Medical Systems Corp., Provision Healthcare LLC., Danfysik A/S, Optivus Proton Therapy, ProTom International Inc, Advanced Oncology plc, Ion Beam Application SA, Elekta AB are the major particle therapy market players.

Industry Developments:

27 July, 2022: UW Health selected Hitachi, Ltd. To provide the infrastructure to support proton therapy at UW Health Eastpark Medical Center. Hitachi will provide equipment and technology to support UW Health's traditional proton therapy room equipped with spot scanning irradiation technology.

10 January, 2023: IBA announced that it signed a contract with the H. Lee Moffitt Cancer Center and Research Institute Hospital for installation of its ProteusONE compact proton therapy system.

Regional Share Analysis:

The Particle therapy market by region includes North America, Asia-Pacific (APAC), Europe, South America, and Middle East & Africa (MEA).

North America: includes the US, Canada, Mexico

Asia Pacific: includes China, Japan, South Korea, India, Australia, ASEAN, and Rest of APAC

Europe: includes UK, Germany, France, Italy, Spain, Russia, and Rest of Europe

South America: includes Brazil, Argentina, and Rest of South America

Middle East & Africa: includes Turkey, UAE, Saudi Arabia, South Africa, and Rest of MEA

The particle therapy market is anticipated to be dominated by a number of regions in 2021 and beyond. With the greatest number of operating particle therapy facilities and the highest rate of treatment uptake, North America dominated the particle therapy market in 2021. There is numerous particle therapy centers that are currently operational in the US, and more are being built. Several regions are anticipated to see significant growth in the particle therapy market in 2021, but Asia Pacific is predicted to grow at the fastest rate. In recent years, the Asia Pacific area has significantly increased the infrastructure for particle therapy, and several new particle therapy facilities are currently being built or developed. The incidence of cancer is notably high in the Asia Pacific area, especially in China and India. This opens up a sizable market for particle therapy procedures, which have benefits over conventional radiation therapy and chemotherapy include higher precision and fewer side effects.

With a number of established particle therapy centers and an increasing number under construction, Europe is another key competitor in the market for particle therapy. One of the most active nations in the region for the development of particle therapy is the UK, followed by Germany and Italy.
